## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to human DNase, classified in class 424, subclass 94.61.
- II. Claims 2-17, 23, drawn to a DNA isolate, expression vector, transformed cell, polynucleotide probe and methods for producing same, classified in class 435, subclass 320.1.
- III. Claims 18-22, 28-29, 35, drawn to methods of treatment, classified in class 424, subclass 94.61.
- IV. Claims 24-27, 30-32, drawn to polymer conduits and methods of use therefor, classified in class 604, subclass 93.
- V. Claims 33-34, drawn to a method for purifying pharmaceutical preparations, classified in class 210, subclass 632.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the methods of treatment can be practiced with a materially different product such as an antibiotic.

---

Inventions of Groups I, II, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean C. Witz whose telephone number is (703) 308-3073. The examiner can normally be reached on 6:30 a.m. to 4:00 p.m. M-Th and alternate Fridays.
